

Help Setting up Photo Studio for Website Pictures (Kakaako)

Location

Hawaii

<https://www.genclassifieds.com/x-678873-z>

We are working on our website and need to set up a photography studio in our office. We have great afternoon lighting along with purchased lights and backdrops. We just need a tutorial on setting up and shooting the different types of products we have. We need someone with experience photographing jewelry, pillows, and small gifts with a white backdrop. We only need a tutorial and no actual photography will be needed. Our photo sessions will be on demand so we don't want to hire a photographer and will do it in house. We also don't need any photo editing assistance as we already have someone to do that. Please respond to this listing and let us know what type of experience you have and if you have work to share that would be awesome!

Please give us an idea of what you would charge as well. Thanks :)
