I have 2 kittens I am trying to find homes for . 1 female that is black w/bob tail and 1 male that is orange w/full tail . They have been outside , so if they are going to be inside it will probably take them a few days to get adjusted to the environment . The will come up to you and rub on you , but are uncomfortable being held . The male is scared of dogs but the female will walk up to dogs and rub on them . It will not let me upload pictures , but I do have.
