

Color Restoration Career (Mero Detroit)

Location

Michigan

<https://www.genclassifieds.com/x-679949-z>

My company manufactures a color restoration coating product that quickly returns color and shine to most things faded by the sun. The product offers unlimited potential revenue streams to the right motivated individual. Required skill set includes:

- Automotive/Fleet vehicle painting experience (unless you only want to focus on the roofing industry)
- Motivation to use the resources available to develop business leads
- Good people skills and attention to detail

Our product restores RV's, buses, fleet vehicles, boats, signage, tile roofs, metal/painted structures/equipment, basically anything that fades. The cost involved in starting up is minimal, we charge no dues or fees, we merely sell you our product. Our product is normally applied with a turbine driven paint application system, such as "Accuspray", a good turbine and paintgun will run about \$1500. Beyond that, just basic supplies and materials. Our product is EPA certifiable which allows you to work right at your clients location. Your local area has much potential for the right motivated person, we are looking to work with that person to get them trained in how to make big money using our.
