Are you in need of live sound for your band or event that is coming up? Shoot me an email and let me send you a quote. I'm one of the most affordable live sound engineers in the area. I'm here to make you look and sound good on a budget!

Do you have ever go to a gig and find that there are cords everywhere on stage, and the overall presentation feels messy, and you're afraid you'll trip? Let me help! My wireless setup makes life easy! I use a state of the art mixing board with wireless mixing, meaning that I can do your mix from anywhere in the house assuring that you sound the best! Unlike some engineers, my board is capable of doing up to 6 separate monitor mixes!

Can I make you sound good? Of course! Is this system going to bring down an arena? No, it's not that big, but I can make you sound good for up to a crowd of about 400 people! If you have bigger needs, let me know, I have connections to equipment and can get things worked out!

Are you needing video footage, or recordings of your shows? I can provide static shot (1 angle) HD video for an extra fee. I can also provide recordings straight from the board in raw wav files if requested, for an extra fee. Need it mixed and the audio synced with the video? I can do that as well!

I'm also a working musician, and I know just how important it is to show up to a gig looking professional, and having a professional attitude.

So if you're thinking you might need live sound for your band, or an event you are having, shoot me an email!
