Beware of Door Knocking Roofer "Insurance Claims Specialists"

Professional Roof Inspections, Adjuster Services,
 Property Scopes & Project Management/Supervision Services
 Tile Roofing, Wood, Asphalt, Steel, EPDM, Modified Bitumen, Flat roofs

*We're kind of old fashioned; We're happy to prepare a competitive written bid on any type of roofing or repair, even on insurance claims. *We are second to none in assisting Homeowners with design and planning services.

Low sloped or complex roofing systems on large commercial structures can be problematic by design; hail damage can be elusive to see but will have ramifications down the road. STEEP ROOFS CAN BE DANGEROUS TO INSPECT AND LEAD TO HOMEOWNER LIABILITY if a inspector gets hurt. . .

To compound the cost and confusion are the "traditional" roofing companies, who of course want to replace all roofs, but do not have the confidence, ability, skill, or specific products to Repair ANY ROOF, if a repair is warranted, or until the budget or or timing is right for the property owner to consider replacement.

What better than a licensed property adjuster/General Contractor and Commercial Roofer to prepare a

UNBIASED report for your best interests. These reports can also be used as a basis of comparison in the event of a claim document. We don't make any insurance company to tell you what to expect or what to do.

These reports are based on the best and most available, and most up to date information (such as Xactimate and RoofScope.com) specifically designed to put the Homeowner or Facilities Manager In Control.

*Accredited All Line Claims Adjuster-Florida License # W01104
