So this lady is posting that she is a nurse when she is not a nurse divulging lies under the false pretense of being a nurse!! She is telling lies about medical information that is first and foremost false and second against the law what she is doing ..... First thing making people believe that you are a nurse when you are not is against the law, second if ever she was a nurse anywhere she would know how bad it is to divulge any information from any person's medical record ..... She says she is a nurse at st. ALS and just went off about medical stuff acting as if she was a nurse who treated me ..... Wow!! No joke !! So basically this is a part of the black mail right? Stop posting about st. ALS or you will spread lies about me ... Under the false pretense of being a?
