

Need a Product Logo Created 50

Location **Nebraska**
<https://www.genclassifieds.com/x-684244-z>

I am looking for someone to create a logo for me which I can use on a line of products I am developing.

I would like to get several different designs from different people and I will pay \$50 to the person who's logo I pick. The logo must be computer generated in electronic form (no pictures of drawings) that I can edit or resize as I see fit.

I am a small start up guy who is making some food products that I sell at craft shows and flea markets, etc. I do not have the budget to hire a marketing company to do this for me and my artistic ability to do this myself is basically zero.

Contact me by replying to this ad and let me know if you are interested and I will give you the details such as what the product is, company name, what size and format it needs to be in, and any other info you will need to know.

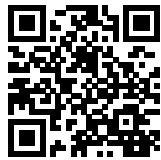

The \$50 will be awarded in a gift card of your choosing, store credit somewhere, or however you decide. Not only will the person who's logo I select get the \$50, but you will be able to use me as a reference for your work. Actually, even if your logo isn't selected you can still use me as a reference for your work.

I don't care if you are a high school kid who has good artistic skills, someone who is just starting out, or a seasoned professional artist, I want to see what we can do.
