

Small Job

Location **Arkansas**
<https://www.genclassifieds.com/x-684806-z>

Planning to replace my old mailbox. Need assistance installing the new one.

Job would be digging a hole [you supply post hole digger], and set the post. Must be installed sturdy enough to not fall over, but you get to determine good depth and whether to use concrete, packed sand, etc around the post No idea what soil is like under mailbox spot, but this is Arkansas so probably some rock. Post needs to stick up 36 inches or so. Mailbox is one of those one-piece plastic kind that slides down over the post.

Looking for estimates Respond to my Craigs List
