Get your music recorded professionally and tastefully. With 10 years of experience our studio offers the very finest in audio quality, execution and production. We also offer a variety of back-line equipment available for artist use. I have a 24+ track console, Class A outboard preamps and a large assortment of mics from Shure to EV to Neumann. I prefer to record the old fashion way with intellect knowledge and experimentation, I don't use protocols and prefer not to call myself a hero by applying a couple of plugins I stole from the internet on direct in recorded guitar track... that's for the dime a dozen subpar "recording engineers" that want to rip people off, NOT myself... just an example of my integrity and passion for the art of recording. I record music and songs the with the same intellect that some of the greatest music of our time was recorded. I like to move souls and raise hairs when it comes to this. I can work with people of any genre but at my discretion, I won't work with some people. I'm in this to help local musicians out, make great records, meet people in the process and push perfection through obsession. People who think they know everything, can never learn anything, something to remember. Call, text or e-mail for more for any questions or inquiries, I'll be happy to answer them. Know what you want to record! Have songs written. Don't ask me to help you write unless you want to hire me as a producer, if so, that can be talked about. Bring me an interesting project.

Rates:

\$40 per/ hour (not including set-up)

\$300 per day (12 hour day)

\$1000 per 7 day week (12 hour days)
