

ELECTRICIAN Side work residential (Okc)

Location

Oklahoma

<https://www.genclassifieds.com/x-685504-z>

We are real estate investors and have paid thousands of dollars to a few electricians. Currently I need finish work done on a house that was all new rewire. I have can lights wired that need to be installed in the sheetrock, dimmer switches, and finished w/ trim. Ceiling fans and lights installed.

What I am really after is someone who has experience doing everything residential electric. I am ready for a new go-to guy for all my electrical needs. I rarely need to pull permits but they can range from rewires to tapping into older knob & tube, installing new AC disconnect, trouble shooting problems on 1920-1970 houses.

For consideration change the email subject line to "Home Electrician". State your experience in as much detail as you care to. Must have transportation and a good background as you will eventually be going into occupied rentals.

No drugs, no drama, just good old fashioned work for money! (We 1099 over \$600)
