

The Truth of Casper The Dogs Death

Casper

5 month old pup
Died: August 27, 2015

Summary: Casper was a very sick dog that Celine said was in her rescue at around 9 a.m. on August 27. However, she failed to get him to a vet promptly. She waited several hours and at the urging of people finally got him to a vet. But it was too late for Casper. She capped the amount of money to spend thereby tying the hands of the vets as to what they could do. In the end she spent more on him after his death than trying to save him.

This was the first photo posted at 9 a.m. on August 27.

This was Casper at the vet that afternoon of August 27, 2015.

There was so much going on, so many threads, so many comments, that trying to understand Casper's last day here is confusing. Though my sources and screenshots, I have been able to piece together the events of Casper's last day here.

Please take your time reading through what I've just found on the Internet this is so horrible. I saw warnings of this chick a few hours ago so I looked her up and found a lot of negative things on this woman. Celine Ashlie. I posted it to my Facebook and all these people started commenting on how they heard the stories too because she lives so close to me. I had to zoom to read the comments, but the comments from the lady Celine are the most unnerving because you can tell she's backtracking. This IS A DOG! That poor guy needed help and Casper the dog suffered instead and then died. The woman was begged on these pictures to take Casper to a vet and she did nothing! This must be a sick joke because anybody knows you can go to a vet immediately if there's an emergency. It just seems like excuses. I guess read for yourself, but she gets dogs from here everyday so you might want to watch out that she dont buy your baby. Some lady commented that she likes to play the victim but the only one of those I see is.
