Computer infected or just running slow? I will remove you virus, spyware or malware infections for \$50. I also offer a complete software restoration for the same price. I will back-up any files that you need to keep off of your computer, then totally wipe it clean, deleting everything on it. Then I will re-install your Windows (XP, Vista, Windows 7 or 8), GENUINELY activate it using your product key (sticker on the PC), download and install all necessary drivers, install virus/ spyware protection and some other basic programs, and finally, replace your files that I backed up (scanning them for viruses first). This process will eliminate any traces of the infection and bring it back to it's original stae, cleaning up the junk and leaving it running smooth again. All for \$50!
