

## **Older Aircraft Avionics**

Location **South Dakota** https://www.genclassifieds.com/x-694548-z

Having avionics problems with older avionics systems? Cost too much to repair and really can't afford a new system. I have 30+ years of bench experience mostly on King Radio avionics.

My shop rate for estimate is only \$ 50.

My opinion on good older systems, KX170B/175B systems, RT 328T and RT 385, are the best. Also repair KY96/96A, KY97/97A, KX155/KX155A,
