Someone dies from an Adverse Drug Reaction (ADR) every 5 minutes in our country.

That's 106,000 family and friends lost each year! And you do not need to be taking prescription drugs to become a victim.

Someone else is hospitalized every 30 seconds for the same thing! That amounts to two million Americans admitted to the hospital every year! According to the FDA, it wastes in excess of 136 billion (with a B) to treat ADRs. It is taxing our health care system and raising insurance costs.

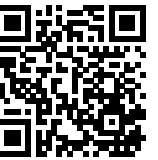

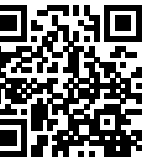

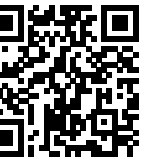

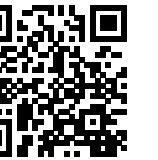

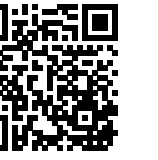

Countless others are seriously maimed or crippled because they do not seek further medical help.

A simple Pharmacogenetic (PGx) cheek swab test can prevent this crisis, but only 10% of our doctors know how easy it is to use DNA technology in their practices to stop this madness.

Our company seeks individuals from all walks of life and work environments to join in the fight with SERIOUS income on the table. There is no reason to flag this announcement because taking action could prevent your death, save the life of a coworker, or the life of one of your loved ones.

Reply to post for more information and compensation plan figures. We will reply with a link to an informative video about our company, our mission, and how you can help with no experience needed whatsoever. We have handsome income plans based on your skills inside or outside of the medical field.

Thank.
