First 4 pictures: There are only 4 babies left for adoption. They are all female: 1 sable, 1 solid dove, & 2 banded dove.

Baby pictures from when they were younger.

Mom (Ember) with her babies.

A close-up of Dad (Vincenzo/Vinny)

Children having a great time with Vinny.

*Notice the parents' hair lengths in the pictures. While they are considered "long-hair" or "teddy-bear" hamsters, you will see that the females' hair does not get very long at all... While males can sometimes have very long hair, the father does not, so I believe that his sons' hair will not get particularly long, either. They are SUPER soft, though. => I've had both short-hair and long-hair hamsters and the long-haired ones feel softer to me.

*Another Note: The sable is in one of the old boys' pictures by mistake, but she is actually female. Her coat will become a rusty-gray or mahogany color in a month or two.

Syrian hamsters make awesome, low-maintenance pets. These little guys are very gentle and great for beginners. The babies are handled regularly and are ready to go to their new homes. Contact me soon for the best chance of reserving your preferred baby hamster. Rehoming fee: Asking \$10 or best offer. Pick up is near 72nd and Giles in Papillion.
