Obama - 8 Trillion increase in 7 years - expanded welfare and lowest employment ration in 50 years"

"You needing to have Obama responsible for Bush's debt from his final year in office really doesn't 'prove your point. "

Well there is a VERY good reason to have Obama responsible for 09 debt. HE approved most of it and added to the budget.

"Bush Jr. added 5.849 Trillion dollars to our national debt. Not 4.5 but 5.8 Trillion, and that doesn't even include an 800 billion in unpaid wars and 787 billion stimulus bill to keep us from falling into financial depression that Obama had to cover on his tab. "

K. lets go with your number.

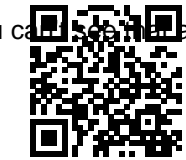

Does he also get credit for the tarp loans repaid'; Because It makes Obama's numbers look all the worse. As you probably know the TARP program actually produced income rather than costing the tax payers money. No you credit the expense to Bush and the income to Obama....

We know Obama need affirmative action to even be considered an Average President. But even giving Bush 5.89 in new debt. Has obama added more or less?

No really. More or less.
