Hello I have a Great Dane mixed with maybe some pit. She is about 4 months old. She has had all puppy shots given by me but needs a rabies shot. He has had flea and tick meds. She has been around my 1 year old sister and does great! She is about 25-30 pounds and will not be big at all! She just needs more attention and I am moving to an apartment and can't take her. There is a rehoming fee which I will include a freezer bad of food to start you off and the rest of her flea and tick.
