Founder House is a network of co-living spaces for people in tech. We offer centrally-located and affordable housing for developers, designers, and tech entrepreneurs. Founder House is more than just a place to live - it's a tightly-knit community and alumni network of people in tech who help each other start great companies, get better jobs, and learn new things throughout their careers.

Our vision is to build the largest, closest network of people in tech. Founder Houses's mission is to accelerate human progress by bringing people with shared passions closer together.
