

synthesizer player seeks collaborators

Location

New York

<https://www.genclassifieds.com/x-696315-z>

i'm a synthesizer player and i've been working on a project that could use some other musicians. i'm twenty six, been playing music my whole life. can read music, play in a modern jazz trio on piano and have worked as a musician. i'm doing some heavy stuff right now though, using noise/bass/distortion. it's fairly simple, i'm working three or four chord progressions, just using a lot of dynamics/textures to make them interesting. looking for any collaborators really. my first thought was a drummer but i'd be open to any ideas you've got. have a space in bushwick, pretty free right.
