Motivated and experienced Software Engineer

The Software Engineer solves complex application development problems. The ideal candidate will provide technical and administrative direction for personnel performing software development tasks, including the review of work products for correctness, adherence to the design concept and to user standards, and for progress in accordance with schedules. Will be responsible for developing and implementing applications. Develop plans for Information Technology (IT) systems from project inception to conclusion.

Analyze the identified problems and the information to be processed. Define the problem, and develop system requirements and program specifications, from which programmers will prepare detailed flow charts, programs, and tests.
