I have a complete and working COMPAQ PRESARIO CQ60-410US, that comes on, but the keyboard needs to be replaced. I tested it (See pics) using my desktop keyboard.

Come with a HP power supply.

If you are good with fixing laptops this is for you!

A new keyboard on eBay is less than 20 bucks, and they're easy to install.

Or, you can part it out, the screen alone is worth 60 bucks.

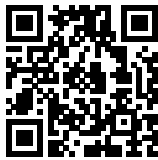

Call soon, this won't last!
If you can see this ad, I still have!
