

# late 50s early 60s Vacuum Tube Amplifier Project w Speaker (70 USD)

Location **Kansas**  
<https://www.genclassifieds.com/x-696845-z>

Classic Vacuum tube amplifier ready for your guitar / hi fi project

Chassis is in need of further cleaning on outside but beneath is a pristine working environment ready for testing and simplifying the circuit to just include : input pre amp phase ,gain stage and speaker out put eliminating all the other organ operations that the other tubes did such as vibrato and controlling reverb ETC.....

harvested from a Wurlitzer organ that was in our studio , the tubes were damaged in shipping so you will need to re-tubed : cost would be around the 60 to 70 dollar range for new old stock tubes from that era

and if your reading this far into this post you already know plenty of guys in KC with a vast collection of tubes as do i if you need help locating the tubes

speaker is what i believe to be a Rola or Jensen field coil design speaker , that is the proper speaker for this amplifier specified by Wurlitzer

this amplifier has been registered with the us patent office and would have to have accompanying schematics with the U.S. patent office online archives

call and lets negotiate the price no worries!!!!!! just trying to get rid of stuff THANKS!!
