I have this KTM that I purchased and maintained since it was new. I am the second owner but maintained it for the first owner. This is a great bike, a bit dirty in the pic though. There are some cracks in the plastic that have been welded but its all there and looks good. The rear tire will need to be replaced soon. It was rode this last season. If you know these bikes then you know how awesome they are, if not then do some research and you will see that they are good desert bikes, road bikes and ok moto bikes (a bit heavy for moto). Looking for a newer lighter KTM with the magic button.  
 Rear shock just rebuilt 9/2015. Both front forks redone with new seals. Engine runs great. \$1500 obo
