

STOOL DONATION

Location **Pennsylvania**
<https://www.genclassifieds.com/x-699224-z>

Thousands of people every day suffer from diseases, infections, and disorders of the intestinal tract causing short and long-term pain and suffering. Bacteriotherapy (or Fecal Transplant) is a new treatment for C. Diff and even inflammatory bowel diseases. It involves the stool of healthy donors being implanted into patients with those conditions.

We are seeking FEMALES ages 16 to 45 to become donors.
Your compensation is up to \$875 with the ability to earn more (depends upon the number of donations).

Your bowel movements will be collected at home. We provide the container that you'll use to capture your stool and we'll also take care of transporting it. You will not have to visit any facilities.

To apply, go to <http://www.collectmystool.com/enroll>

There's a video on our main page that explains stool donation and how it benefits others.

We truly appreciate all of our donors.

Thank you.
