

Modded Xbox 360 Console (60 USD)

Location

Indiana

<https://www.genclassifieds.com/x-699933-z>

The Xbox 360 has been flashed with LT+3.0 custom firmware. That mod allows the user to play burnt games and is designed to be stealth so that it can be used on xbox live. This listing is for the modded console only. It works perfectly and has never had any issues before. Thank you for viewing my listing! Just send me a message if you are interested or have any questions. I hope you have a wonderful day!

---Any backup games are for \$5 per---
