

Rehoming Crested geckos (Deland)

Location **Florida**
<https://www.genclassifieds.com/x-701694-z>

I need to seriously downsize my pet gecko collection, so these lovely cresties need to find awesome loving homes.

___Adopt a gecko & GET 50% OFF the adoption fee of another! (50% off the lowest adoption fee)___
 Individual adoption fees are listed on each photo

They are all eating a rotation of Repashy CGD, Repashy Grubs & Fruit & Pangea Complete with crickets offered occasionally. No shipping! I'm located in Deland & willing to meet within a reasonable distance.

-LemonDrop, RTB (proven female) from Crested Mania (<https://www.facebook.com/crestedxmania>), she has red & black spots & fires up a lot darker than shown. She can be paired with any of my males for breeding if you would like at no extra charge (she has not been bred in my care, but was proven in her previous home). You can see pictures of my male breeders at my facebook link above. LemonDrop weighed in at 34 grams on 5/25/15. She is completely unfired in the pictures which were taken outside in natural light.

-Male #1 (Cookie) is also from Crested Mania, he is RTB and was proven in his previous home.

-Male #2 (Crush) is from unknown lineage, he's a RTB virgin male. Fires up a BRIGHT beautiful orange with great creamy portholes. He would make gorgeous kids with Luffy! He would stay with me if I didn't already have a stellar creamsickle male.

Two of my Breeder friends of his (one is available for sale listed above) (his daughter), they were bred & dal from a breeder who doesn't like to be handled- very noisy. Using 4 crickets a day (assumed one used as a mealworm was missing when I caught him at 6 grams).

Finnick (unsexed) produced by myself out of Chi/Jelly Dad (Chi is a creamsickle & Mom (Jelly is a bright orange tiger. Photos of Finnick's parents & additional photo of Finnick can be seen on my Facebook page (<https://www.facebook.com/sierra.coe>). Hatched 7/7/14
