Maine web designer/developer with 10+ years experience. I have worked with clients from around the world, both small and large budget including famous national landmarks, Grammy award-winning artists, nonprofit organizations, and everything in between including plenty of small and mid-size Maine businesses that you're probably familiar with.

I am reasonably priced at \$40/hour and offer various optional services in addition to web design including graphic design, logo creation, SEO services, Google Adwords management, ecommerce and marketing, mobile websites, social media marketing/management including Facebook and Twitter, newsletter/mailling list management, hosting, tech support, maintenance, etc. I am well versed in Wordpress.

Depending on what your goals are, I can do many small business websites for under a grand, so get in touch for a free quote. Here's a few recent sites I've developed:

I am a professional and go-to person for communicating with clients who are not tech savvy. I will not let you down. I have been in the business for over 10 years and have built out or redesigned many websites. Dozens of local references available upon request, and I'm happy to take face-to-face meetings to discuss your project goals.

I'm located in central Maine (just outside of Augusta) and I'm generally in Portland two days a week. If you want a competent web developer who will return your calls and will be available after your project is completed, give me a call at 207-406-5526 or shoot me an email. I don't answer the phone is because I'm with another client or away from my desk - leave a message and your call will be returned.
