Portable Breath Alcohol - BACtrack B70 Breathalyzer

Product Description:

Designed in the USA, the BACTRACK is one of the newest and most innovative breathalyzers available. It combines a sleek, user-friendly design with advanced BluFire Alcohol Sensing Technology. This provides accurate and reliable test results at an affordable price. Because the BACTRACK does not require the users to touch their lips to a mouthpiece, it is easy to share with multiple users and to test multiple subjects. This is helpful in a social setting when multiple people may be sharing the device. Simply test, restart, and test again. In addition to speeding up the testing process, this feature also saves money, as mouthpieces never need to be ordered. The BACTRACK's BluFire Sensor Technology provides extremely accurate test results by steadying airflow inside the tester and requiring a deep lung air sample for each test. Each test result is clearly displayed within three seconds in increments of 0.01 %BAC from 0.00 - 0.40 %BAC. The BACTRACK is perfect for both personal and professional use and is the easiest way to track your Blood Alcohol Content.

Main Features:

- Battery-operated breathalyzer provides instant blood alcohol content measurements
- BlueFire Sensor Technology provides exceptionally accurate readings

- Circular Light Rings provide visual feedback for ease-of-use

- Ultra lightweight design fits in your pocket for complete portability

- BACtrack device

Item is brand new and comes in a sleek and convenient carrying pouch. Retail for \$79.99.
