Personal Tech Consulting

www.PersonalTechBoston.com

Are you a home user or a small business owner with a problem with your computer(s)? Will it no longer boot? Did the hard drive crash? Has a software upgrade gone haywire? Perhaps you have a computer virus you can't get rid of?

If you have any of those problems or any other issues with your machines then Personal IT Consulting can help you. For \$35 an hour I'll work to solve whatever problem you may be having, and if I can't fix it then you don't pay! I can repair both Macs running any version of Mac OS X (and Mac OS 9) and PCs running any version of Microsoft Windows.

In addition to solving/fixing problems I can also help you setup new equipment, get you running on your new ISP such as cable modem or DSL, network the computers in your house together to share the same printer..etc. If you own a smartphone such as Windows Mobile phones, a Palm Treo, Nokia Symbian device, RIM Blackberry or Apple iPhone I can help you get setup with those devices too in regards to getting your email to work on them, synching them with your desktop/laptop computer and getting music on them if they have that feature.
