*Email me and let me know where you live, how many cats you want, etc.

I will gladly deliver you some free barn cats if you provide some information about yourself.

*All cats have shots and are neutered before being delivered to you. They make excellent rodent control.

I work with TNR (trap neuter return) feral/stray cat organizations and with private clients looking to re-home "problem" house cats (which often make perfect barn cats!), cats that may be super shy or have aggression problems (only when forced to interact with people in tiny apartments!) and therefore don't make good pets, but would be just fine as an outdoor "working" barn cat.

Also, when you first get the cat, you will have to contain it in an acclimation cage, tack room, horse stall or some kind of small room in the barn for about 1-2 weeks so the cat accepts the new place as home and doesn't try to run away. I can explain more about this to you when you email me.
