

75 kW Onan Generator (Marinette)

Location **Wisconsin**
<https://www.genclassifieds.com/x-708785-z>

75 kW Onan natural gas or propane generator. Produces single or three phase and any voltage as it is adjustable, scalable and customizable. Powered by a Ford V-8 and runs like new as it only has 806 hours since new. It was municipally owned and maintained run a half hour every week whether it was needed or not with oil changed every 25 hours. It is in very good shape. Can be delivered if needed for free within the next couple days before it's unloaded from my trailer. Comes with a new automatic load switch and remote control. If you need a generator of this caliber and price these units, you will buy this one. I will guarantee this unit to work or your money back. Thanks for.
