## Music Promoters amp Agents Looking for an Edge to Book More Gigs

Location **Tennessee** https://www.genclassifieds.com/x-708910-z

I'm looking for someone big into the music scene who wants to help bands promote themselves using the new "beacon" technology.

That might not make any sense, so lemme explain. A beacon s a small, inexpensive electronic device that could help a band create a fan club and let all their followers know where they're playing every night and send them free text messages. It costs \$50 bucks a month!

Taylor Swift and Zac Brown have used them: http://chicagoinno.streetwise.co/2015/09/11/zac-brownband-will-be-the-first-major-recording-artist-to-use-beacons-at-911-wrigley-field-show

I think there's a great opportunity for you to make money while help the local/regional/national music scene.

To get a taste of what I'm talking about, go to www.BeaconTrends.com and use your imagination about how this can help indie bands.
