Being a DJ involves hundreds of tasks that the majority of people do not even think about. Between finding gigs, maintaining a legitimate marketing presence, practicing, and actually getting out there and DJing, gathering the music for these events can be time consuming and tedious. For a lot of us, digging up records that nobody else had was one of the passions that led us to the craft in the first place. Unfortunately, over time as DJs find more success and their schedules fill up, it becomes more and more difficult to find time to scour through hundreds of blogs to end up walking away with only a handful of songs. Let alone if you need to find a clean version for the radio.

This is where DJ record pools come into play. Instead of spending hours searching through the dark abyss of the Internet to only come up with three sub-par remixes, our pool consolidate all of your needs in a convenient, one stop shop for MP3s. Not just any music however, we break down the track you need into a clean version, dirty version, 8-bar intro version, acapella outro version, and many more. These tracks are always high quality, no tags, and some even come with cue points built in. Our new site is like a dream come true to a DJ who is short on time, or any DJ who isn't sure where to start their search for the newest tracks.

Using Google to find a record pool is like standing in the middle of Times Square and asking where to find the best cup of coffee. That's why we have come up with a site to make your 2015 record pool shopping experience a walk in the park.

To be placed in our free record pool, reply back with the info requested below:

1. full name
2. DJ name or company
3. Email (we do not share your email or spam you)
4. Phone
