The posting for bulldog puppies is a scam. They have posting in 3 different cities that I have seen .. they all have the same pictures work different numbers and some say email. ... I thought one was real asked for more pics and was told to log into craigslist where they said more pictures where. .. it just went to their post where later I found they had then post one on behalf of my account

I also want to add that they say they lived in different states and cities add
