We are a local Permaculture school and community farm, doing TONS to help the community, but we are so short on time we're only tapping into about 10% of what's possible here. We have extensive experience (and existing stock/infrastructure) for a rabbitry/meat rabbit operation, multiple aquaponic operations, duck, quail, and other poultry, even a CSA! We are a DRUG FREE property (and yes, we still consider marijuana a drug), so please only apply if you are a NON-USER. Let me know what your availability, passion, and experience is, as well as where you are located, and what your ideas are, and let's work something!
