

# Need Telephone Assistance To Set Up Proxy Server On VPSVPN (Anywhere USA)

Location **South Carolina**  
<https://www.genclassifieds.com/x-710567-z>

Hi,

I am fairly computer literate, but I would like a little help setting up a private proxy server. I can sign up for whatever hosting package I need from GoDaddy, I might already have the correct plan.

I am frustrated after watching a dozen or more YouTube videos. Everybody does it a little different. I need a step by step phone tutorial on how to set this up right the first time.

I have purchased a brand new Windows 7 Pro computer that will need to connect to the proxy server exclusively. I might want to set up 2-3 more computers, each with unique and dedicated IP addresses.

It is my understanding, and I may be wrong, but it seems there are free programs for the necessary scripts. Then I just need coaching on LAN settings.

I have PayPal. I am willing to pay 1/2 upfront and 1/2 immediately upon successful completion.

Please email me an informal action plan and name your price. This is a 1-2 hour project at most.

I ask that you be US based and you speak very clear English...If you are multi-talented, I need some reasonably priced assistance in optimizing my corporate website, making awesome landing pages, and getting my WordPress site very mobile.
