Finally a leading mattress seller,Jordans Furniture admitted sleeping on a foam mattress is hot. Yes, Elliott shot himself in the foot when running a TV ad saying this. After hearing what we believed since foam came out ,we would have to be ignorant to buy a foam mattress of any type. I wonder how many times Elliott of Jordan's Furniture,(when ne was on the sales floor) told customers that foam was not hot to sleep on. He admitted this because he is pushing a diamond dust foam mattress and is trying to make you believe that this foam mattress is not hot to sleep on..Ha Ha. They say diamond is the only gem that will cut glass. Can you imagine what these dust particles will do to foam as we all toss and turn on a mattress. It will tear foam to shreds and loosen the dust particles to a point where you could be breathing diamond dust in as you sleep; All this for only \$1997.00. Elliott really screwed up on this one. All you need do is think about what I have posted and you will realize we are CORRECT. ON THE LIGHT SIDE,does this mean we will have DIAMOND DUST MITES???
