If you're looking for USB flash drives - any type, any shape, standard or custom designs - we can help!

Craven Films can provide you with the drives you need, at excellent prices.

Please see the 4 photos accompanying this listing for examples of both the most popular flash drives, and some examples of other types, including custom flash drives.

Please call or e-mail us anytime for a firm price quote. Costs can vary significantly, depending on the model of drive and how much flash memory you need. Drives can have anywhere from 64MB of memory (very small) to 8GB, 16GB or more. Also, the cost of the flash memory used in these drives can change as often as weekly.

We can help with design and layout of the artwork for your drives, which can include 4-color printing of logos or other graphics.

Delivery of flash drives typically take about two weeks, although some models are available within a week, and custom-designed drives (as in the attached photo) always take longer.

These drives are a great tool for your business or event!
