I am, once again, trying to complete a research project on detention center operations to satisfy the requirements for my Master's program. For this project regarding jail operations, I need several female and male models to demonstrate a clothed pat-down search and an unclothed (strip) search, as well as the process of applying various inmate restraints (handcuffs, shackles, transport restraints, etc), basically the booking process from intake to housing in a jail environment. If interested, I look forward to hearing from you. The compensation for the project is open and.
