

Hiring an Exceptional Experience Designer (baltimore)

Location

Maryland

<https://www.genclassifieds.com/x-713818-z>

We are seeking an Experience Designer who can see beyond what our product/service is today and can execute on a vision for what it could become. You will be concerting, designing, and shipping mobile and web applications that millions of people use in order to enhance their dining experience.

In this position, you will: create designs that respond to the needs and motivations of real people; take a sketch or wire frame and transform them into beautiful, pixel-perfect interfaces; communicate visually and express your ideas with skill and grace whether standing at a whiteboard, drawing on a napkin, or presenting on screen; see visual design as a language and can explain what your design decisions are meant to communicate; demonstrate a strong, collaborative ethos and have the ability to inspire and facilitate collaboration with others; and translate a personality or "feeling" into a cohesive visual system that can be applied across all channels.
