Two-thirds of Oklahomans die prematurely from heart disease and cancer. You do not have to be one of them!

Dr. David B. Agus, in his book, The End of Illness, says you can die of old age by doing three things: eat real food, reduce inflammation, and know yourself on paper.

Getting a heart and lung scan gives you a wealth of information about yourself on paper. If you are healthy, your scan result will give you peace of mind. If your scan discovers a problem with your heart or lungs you'll know exactly what to do next to get back to wellness.

Don't wait for bad news to hit you, get a heart and lung scan now!

All scans are done at Advanced Body Scan of Oklahoma City and include a board certified radiology report. (Some restrictions apply).
