\*\*\*\*\*

Hi my name's Tony. I am a skilled auto mechanic with the experience and know how to tackle just about any problem with your vehicle. My approach is simple.

\*I first need to know your MAKE, MODEL, YEAR, and PROBLEM, I have a extensive library of resources so if I am not familiar with you specific issue, give me 24 hours so I can respond correctly, and with a price quote.

\*I have a wide range of skills in many kinds of vehicles, I WORK ON: Toyota(lexus,scion), Nissan(datsun,infiniti), Ford(lincoln,mercury), Honda(acura), All G.M

\*I take great pride in my work and I always know what I'm doing BEFORE I do it, You don't have to worry about some idiot chopping up your car and then not knowing how to fix it.

\*I am very calculated, organized, and controlled when working on a car keeping screws/nuts labled, pictures, having great references and keeping a clean area, are especially important when doing major car repairs.

\*If check engine light is on I can scan it and tell you what the problem is in detail.

---

Shocks each 40

Struts each 65 compressed, 50 each if full assemblies. 50 each compressed loose

These prices are just a guide line, some can be less, some can be more, it depends on the vehicle.

\*\*\*\*\*I'm seeing a lot of metal to metal brakes, I strongly encourage you to get these taken care of.Â

All it takes is a hard emergency brake on those to completely fail out, and they usually will when needed most.Â

Even if you don't go with me, please get them done, even just pads is better then nothing.\*\*\*\*\*

\*I like to start work early to mid morning, I do not work on cars at night unless its a emergency.Â
