

1990 GMC SIERRA 2500 4x4 (4500 USD)

Location **California**
<https://www.genclassifieds.com/x-715213-z>

1990 GMC sierra 2500 in great condition.

Runs and drives flawlessly never had an issue with it. I love the truck to death but its time for an upgrade.

I replaced every single part that was bad or going to bad and has brand new oil and coolant maybe only 100-200 miles on it since, idle tensioner, serpentine belt, air filter, start, oil filter, spark plugs and wires, wheel studs, and ball joints.

Everything I've added is 4 mode strobe led lights in the grill, headlights, taillights, radio, 6x9 pioneer speakers x4, 2 12 subwoofers, bed lights, line x bed, FMF tailgate badge, flowmaster 40 series exhaust with 4" tip, 4.56 gearing, Lucas fuel system cleaner and trans slip fix (trans wasn't slipping before just wanted to be safe and make it last a lot longer) , tinted windows back is 2.5% and fronts are 20%, new pro comp o window wheels 15x10, pro comp front shocks, and 96 GMC 60-40 seats out of my old 96 GMC 1500.

Interested in trades for a 96-98 1500 or ford f150 97-01 only 4x4 no 2wd crap I go to the mountains and sand dunes to much so a 2wd is useless to me.

(My rear bumper was stolen and it had been broken into so that's why part of the rear window is covered in some pictures but it is fixed)
