WHY Organic - Green - Eco-Friendly

- 1* MAKE YOUR HOME SAFER
- 2* PROTECT YOUR HEALTH
- 3* CLEAN UP YOUR INDOOR AIR
- 4* HELP THE ENVIRONMENT
- 5* SAVE SOME MONEY
- 6* GIVE BACK TO YOUR COMMUNITY
- 7* KNOW WHAT'S IN YOUR PRODUCTS

1* MAKE YOUR HOME SAFER:

Warning! Flammable! Toxic! With labels like these on some conventional cleaning products, you get a pretty good idea that they aren't really that safe. Many chemicals (e.g., chlorine and ammonia) when mixed together can be downright dangerous. Small children and pets are especially vulnerable due to higher exposure levels because of their size. Plus, household cleaning supplies are one of the top five substance classes accounting for calls to the National Poison Control Center according to its 2010 annual report. So, minimize your risk with green cleaning products that aren't toxic or as dangerous!

2* PROTECT YOUR HEALTH:

Feel better with green cleaning products -- literally. Unlike conventional cleaning products, you'll know what you're using with green cleaning. You know your pet's health is such a big deal, sneezing, coughing, and itchy eyes are signs that may "make sense" if you stop and think about cleaning with chemicals. Consider many of the household chemical products as conventional products that often contain irritants, mutagens, carcinogens, or products that disrupt the immune system. Switching to natural green cleaning products.

3* CLEAN UP YOUR INDOOR AIR:

Did you know that the use of conventional cleaning products can contribute to higher pollution indoors than outdoors? Volatile Organic Compounds (VOCs), which have been associated with a host of health problems like damage to the liver, kidneys and central nervous system, are released when products are used and stored and can also linger in the air long after use. According to the article "An Introduction to

Indoor Air Quality" by the Environmental Protection Agency (EPA). That's nothing to cough at. Breathe easier knowing that this is not a problem with cleaning products that are truly green

4* HELP THE ENVIRONMENT:

When you choose to use green cleaning products, you are making a vote to protect the environment so to speak. Most ideal green cleaning products are made using sustainable manufacturing practices and naturally derived, safe, non-toxic, and biodegradable ingredients that don't negatively impact the environment. On the other hand, some conventional cleaning products contain ingredients that are toxic, hazardous, non-biodegradable, and from non-renewable resources like petroleum, so they adversely affect the earth's eco-systems.

5* SAVE SOME MONEY

With more and more manufacturers entering the green cleaning scene, natural products are often competitively priced with their conventional, chemical-laden counterparts and in some cases even cheaper.

6* GIVE BACK TO YOUR COMMUNITY:

Many manufacturers of green cleaning products take social responsibility very seriously and often give a portion of their profits to organizations that further social, environmental, and educational change, for example. So, purchasing products from these companies means you are also giving a little back to your community, whether local or global.

7* KNOW WHAT'S IN YOUR PRODUCTS:

Manufacturers of cleaning products aren't required by the U.S. government to divulge ingredients; however, many green cleaning manufacturers make it their policy to be fully transparent, whereas some conventional manufacturers don't and may only list a portion of their ingredients.
