

AlleyShed Concrete Repair (Waverly)

Location **Maryland**
<https://www.genclassifieds.com/x-715505-z>

Good Day,

I'm aware that it's getting late in the season but we have an immediate need for a concrete repair. Attached are a few photos of the project. The erosion goes back under the concrete to the capped pipe in the center but does not go under slab of shed, so we'd need significant fill. Approximate width of damaged area is 5 feet.

Please let me know an estimate of cost and time if this is something doable in the next few weeks before it gets too cold.

!
