selling my 175gal. oceanic bowfront with stand. the aquarium is currently empty and completely cleaned out. (just had it running saltwater for two years. the stand is missing the doors but we used tension rods to hang curtains over the storage area. comes complete with lights, heaters, powerhead circulation pumps, under-cabinet wet/dry filter, and protein skimmer.

the specifications on equipment are:

1--175 gallon oceanic glass bowfront aquarium (6'L 17-24"W 28"H)

1--black stand (32"H)

2--dual 30watt flourescent light fixtures

i have really enjoyed having it it my home and it is always a major center of attention for my family and guests. the whole tank and stand is five feet tall by six feet wide. this is a large setup and weighs a lot, even empty. i recommend 3 guys moving it.

Additionally I have reduced the price from \$1500 down to \$400 because of a small chip in the glass at the top left corner on the seam. It is only a surface chip and may not at all affect the ability to hold water, but I dont have time to test it. It is now a maybe for aquatics but a huge great reptile tank. I can send pics upon request please text or email

Nick
