I travel to my customers

Cleveland Classic TV specializes in repairing large TVs and bigscreens, in-home and onsite. We are servicing all makes and models, including traditional CRT/projection, LCD, DLP and plasma.

We are doing more and more custom home theaters and home automation with lighting and heating controls and security and sound.

We have 25 years of experience, with service fees as low as 40.00 and warranties of up to 90 days. We stock most lamps for DLP/LCD projection units.

Weekend and evening appointments are available! Question and answer Q: What advice do you have for a customer looking to hire a provider like you? A: Check Warranty info

Check BBB reports

Example 1 Q: If you were a customer, what do you want to know about your car? Any ideas to share? A: The main thing to note here in this example is that the Big Box stores are not interested in repairing, only to replace parts. The minimum number of stores are 10, whereby only 4/15 will be. What important information should we have moved through each asking you this? Shop around and see how much the Big Box stores are charging. I have met so many people who throw

[illegible]

We Stock Most DLP LCD Lamps. Q: What do you like most about your job? A: I love travelling the City

and seeing the neighborhoods great and small. The people and families I meet are so thankful for our services that I get food and tips for my work. I also get to meet the family pets and involve the children ,if they are curious in my work. I got my interest from my next door neighbor, an engineer at WPAFB, built his own tv and I was fascinated Q: What questions do customers most commonly ask you? What's your answer? A: How long is warranty ? 90 Days

Do you do inhome service ? Yes !! That is our specialty.

Do we work weekends. Yes

How is our BBB record ? Accredited A-

Is it worth repairing ? Most are and if not we will guide to salvage, sell refurbished or buy new. Q: How did you decide to get in your line of work? A: I have always loved music due to my dad being a Jazz Man. My next door neighbor was an engineer for WPAFB. The two of them shared so much and I was a natural. I fixed my first tv at 12 years of age Q: What are your most common types of jobs? A: Double images on traditional bigscreens are in need of Convergence or Geometry correction IC replacements. We also have seen a lot of power supply problems with LCD/Plasma units. We do a lot of DLP/LCD Lamp replacements Q: Tell us about a recent job you did that you are particularly proud of. A: I had an elderly lady who lost sound in her tv. Instead of fixing the tv, we tied the sound from her cable box into her surround sound system and she couldn't believe the improvement. Labor and materials were around 100.00. To fix the tv would have been over 200.00 Q: Do you do any sort of continuing education to stay up on the latest developments in your field? A: As a member of NESDA and the Spyderman network, we are continuously expanding our knowledge base Q: Describe your most recent project, what it involved, how much it cost, and how long it took. A: We do a lot of LCD and Plasma repairs that involve slow turn on and eventually no turn on. This is a power supply repair, that can be done inhome and price is usually around 150-250.00

We are installing a 50K Home Audio Video system for a Doctor. From the control system in the basement to all rooms throughout the 3 story home. All systems can be controlled by touchpanels or cell phone/remotes !!
