I have two 265 Chevrolet motors out of 1955 and 1956 Chevrolets. One is a power pack 4bbl with a manual, (I think I have the transmission, but it may not be the original.) I have an original 4bbl intake, no carb, the intake may or may not be original to that engine. The other is a 2bbl with an original power glide bolted to it. Engines were pulled from low mileage wrecks in the 60s and have been sitting in barns since then, I would prefer to sell everything together. My father pulled them, and knows more about them. Email me with a number and I'll contact you for more info. Say something specific in the title so I know its not.
