(real number at bottom of post)

Hey there, just putting the word out to individuals that may need an honest carpenter whos very offordable, and gets the job done.

I have a full time job doing floors (if youre in need) but i would love to do light carpentry on the side.

The perfect situation for me, and hopefully you, would that be hiring me to come in and do touchups, repairs after a tenant moves out. I'm someone who is reasonable with his rates, and will still provide a result i can be proud in.

id be working for you in evenings, or weekends, and ill get the job done.

i can do quite a bit now, but if i cant provide a service, i can point you in the right direction to a trustworthy person.

You can shoot me an email or text me, you may call, but i am around loud machinery usually, so it may take awhile for a response.

Anyway, looking forward to hearing from you!
