

Up for sale is a 2003 Exmark Lazer Z HP commercial 48" Zero Turn mower. It is a one owner machine, owned and operated by myself since new. I even have the original owners manual. It has a 20 hp Kohler engine and PTO blade engagement. Ultravac suction and bagging system. Adjustable deck height adjustment from the seat. VERY LOW only 1008 hours on machine! Its runs and operates like new and is only 1/3 into a typical life cycle with proper care. Needs nothing! It has been stored inside and professionally serviced always since new. Lots of preventative maintenance including synthetic oil changes every 50 hours. Many parts have been replaced and updated over the years keeping this in top shape. Perfect for a business or home owner with a large property. Recent new parts installed in the past year include.....

- Starter
- Lower seat assembly
- Tune up
- Tires
- Mow deck bearings and pulleys
- Mow deck belt (will include a spare new \$85 belt)
- Muffler
- Both grass bags replaced
- New Blower for Ultravac replaced a couple years ago

ONLY Selling this machine because I just bought 3 brand new Walker Zero turn mowers and simply don't

have as much use for it. Price is \$2995 cash. Price is firm and no lower offers will be considered. Buy now or lose big. This is a greatly increased price for the spring. A limited time is available to see this machine for or ever. Call 800-828-8282 or 800-828-8282.
